The most beloved and beautiful song sung by Tegan and Sara (who is also my most favorite singer). This is the theme song for the Twilight Saga: Breaking Dawn Part 1. "I Was Made for You" is a fun, upbeat song. (Can't stop, can't fight it) This is one of the most popular songs released in India in 2011 among youngsters. This song was a hit in India and the world. The lyrics of the song are so sweet and heart melting. This is a perfect choice for a wedding reception or any party. It will help you have a good time at home with friends and family. Tegan and Sara's voice has the ability to melt the hard hearts of many (and once melted, they can never be mended). Though it has been sung on some other platforms like FIFA world cup, this is probably one of their most downloaded songs in India on their official website. This song was released on May 28, 2011 on iTunes India and later all over iTunes internationally (except North America and Australia). It was available for free download for 24 hours only.
