DLC content does not appear in my game (on linux).. THIS is the DLC you are looking for. it expands the tree, so that you dont have to go one gun at a time, it does not UNlock every gun in the game, so you still have some goals and something to work towards. and its 1/10th the price of there "lifetime GUNS Dlc" which ive read does not include the various other models they make like animals and cars. buy it..
